### **Day 1:**

Welcome to our practice! We want your visit here to be exceptional! First, our assistants will take your license and insurance information. You will be given a brief tour, familiarizing you and your family with our practice. Our assistants will have you fill out all of our paperwork. Next, the doctor will come in and review your case history in detail and perform our chiropractic exam and x-rays. After the doctor reviews the x-rays, we will get you adjusted to get the healing process started! After your adjustment, the assistants will get you scheduled for your report of findings to review your x-rays and further recommendations for care. A deposit of \$100 (\$60 for medicare) will be required for your first visit, until we understand all of your insurance information. We recommend that you bring your spouse or significant other to the report.

### **Day 2:**

Welcome back! We hope you are feeling much better! Today you will watch a short video on chiropractic and x-rays. This will help you understand your x-rays when we show them to you! The doctor will review the x-rays with you in detail and give the you recommendations to best suit you and your family. All payment and insurance information will be discussed at this time. You will then receive your second adjustment and be on your way to greater health and vitality! Power on!
